ALWAYS A STEP AHEAD. EVEN IN REVERSE

- Reverse gear
- New headlights with LED DRL
- New gearbox cover
- New matte colour

With the same technical characteristics as the MP3 500 hpe Sport, the Sport Advanced has a unique feature that further enhances the practicality of the Piaggio MP3: it is **the first three-wheeled scooter in the world with reverse gear included as standard equipment**. This feature comes in handy for parking and in all of those urban situations where space is limited. Reverse is engaged using the dedicated control on the dashboard with the engine started and the vehicle stopped, reducing physical efforts and manoeuvring times. The headlights with DRL and LED technology, also the transmission cover are the exclusive elements to this model.
